Skills

- **Programming Languages:** Java, Kotlin, Python, JavaScript, XML, C
- **Android Development:** Jetpack Compose, MVVM, MVC, Hilt, Koin, Flow, ViewModel, LiveData Coroutines, Retrofit, Navigation, Services and Components, Kotlin Multiplatform
- **Backend Development:** Spring Boot, Django, Flask, FastAPIs, NodeJs, RESTful APIs, JWT, OAuth2 ORM, Spring Security, Spring Data JPA Hibernate, Serializers, QuerySet, Forms/ModelForms, Middleware
- **Database:** Postgres, MongoDB, MySQL, Redis, FirebaseRealtimeDB, FirebaseFirestore, SQL
- **Softwares & tools:** Android Studio, IntelliJ Idea, VS Code, Postman, Git, DBeaver, Github

Miscellaneous: Operating System, Computer Networks, Database Management System, Object Oriented Programming

Work Experience

Gurugram, Haryana

October 2024 - Present

• Devkraft Technologies - Associate Software Engineer

- Contributed to the development of the Live Election Coverage module in the DeKoder app, enabling users to view real-time election updates, live vote counts, and embedded video streams. This significantly improved app engagement during peak election periods by delivering fast and reliable election data.
- Developed and enhanced the DataHub module, responsible for visualizing historical and real-time election data across all Indian constituencies. Implemented dynamic filtering, sorting options, and interactive map integrations to allow users to explore election results in a more intuitive and accessible way.
- Continuously worked on improving the user interface and user experience of the mobile application by implementing responsive layouts, optimizing screen transitions, and refining visual components to ensure better usability and increased user retention.
- Contributed to backend development of the Solveesy Collection Platform, a Spring Boot-based application for collecting and managing user loan data. Built RESTful APIs, implemented business logic, integrated calling, mailing, and SMS functionalities, and managed data persistence using JPA/Hibernate.
- Participated in the development and maintenance of the Django CMS and Django REST API-based admin panel for DeKoder. Implemented new modules, enhanced existing functionalities, fixed bugs, and improved content workflows to support editorial teams in managing and publishing election-related content efficiently.
- Collaborated with cross-functional teams to identify issues, optimize backend processes, and integrate new features across the app and admin panel. Maintained clean, modular, and testable code adhering to best software development practices.

Remote

July 2023 - October 2024

• Glassfrog Technologies - SDE (Android)

- I contributed to a doctor's appointment booking application, implementing a chat assistant, enhancing UI performance, and resolving bugs. I've optimized user interactions, ensuring seamless scheduling and improved responsiveness. As a full-time employee with Glassfrog Technology, I focus on Android development and have converted XML layouts to Jetpack Compose to enhance the user interface experience.
- Improved app's performance by using Hilt, Coroutines, and ViewModel. Kotlin was used in place of Legacy Java to create an effective, testable, and maintainable codebase. learned about CI/CD, release, staging, and the Git workflow in an agile setting.
- I used Spring Framework for backend development, utilizing Hibernate ORM for database interaction with RDBMS. Maven/Gradle managed project dependencies, streamlining builds and configurations efficiently.

Education

- | | | |
|--|--------------------|---|
| • Siliguri Institute of Technology
Bachelor of Technology - Computer Science and Engineering | CGPA: 8.71/10.0 | Siliguri, West Bengal, India
August 2020 - June 2024 |
| • Mahant Ramrup Goswami Collage
Intermediate - Math, Physics and Chemistry | Percentage: 80.02% | Bettiah, Bihar, India
April 2017 - March 2019 |
